

## Lead Based Compound Stabilizer VNPB-0101

VNPB-0101 is a lead based compound stabilizer for PVC products, which mixed with a proper amount of lubricant. It can increase product surface gloss, and can prevent screw wear because of special lubricants.

### Technical Data

Item	Unit	Value
Appearance	-	White flake
Specific Gravity	g/cm <sup>3</sup>	1.35~1.45
Lead Content	%	21
Moisture Content	%	≤0.5

### Characteristics

- 1) Good initial colour;
- 2) Excellent long-term heat stability and self-lubrications;
- 3) Good processability and compatibility;
- 4) No dust pollutions;

### Application

VNPB-0101 is mainly used for PVC extrusion products, such as pressure pipes, PVC edge banding etc.

### Dosage of Reference

4~5PHR

### Packaging and Storage

Packaging: 25 kg /bag

- 1) Store in cool, dry, ventilated area to avoid heat source.
- 2) Store in tank or slot bucket.
- 3) Storage tanks shall have grounding facilities to prevent static electricity.
- 4) Containers should be clearly marked, sealed, and avoid damage and collision.
