

Ca-Zn Organic Compound Stabilizer VNCZ-0301

VNCZ-0301 is a type Ca-Zn organic compound stabilizer. It is in full compliance with RoHS of EU, not containing banned chemical and heavy metals such as lead, barium, cadmium, mercury etc.

Technical Data

Item	Unit	Value
Appearance	-	White powder
Specific Gravity	g/cm ³	1.35~1.45
Ca Content	%	5-15
Zn Content	%	10-15
Moisture Content	%	≤0.2

Application Instructions

- 1) Environmentally friendly, no harmful and heavy metal, safe and sanitary, up to RoHS and REACH environment standards by SGS test;
- 2) Good coloring at the beginning and excellent stability in the long term;
- 3) Low odor and good chemical & oil resistance;
- 4) Good processability and promoting fusion allow to better plasticization;

Application

VNCZ-0301 is mainly used for rigid PVC profile products, especially for PVC edge banding etc.

Dosage of Reference

4.0~4.5PHR

Packaging and Storage

Packaging: 25 kg /bag

- 1) Store in cool, dry, ventilated area to avoid heat source.
- 2) Store in tank or slot bucket.
- 3) Storage tanks shall have grounding facilities to prevent static electricity.
- 4) Containers should be clearly marked, sealed, and avoid damage and collision.
